Languages: English (native), Spanish (conversational)

Objective

As a passionate frontend engineer, my skills can be leveraged to build complex user interfaces and become a collaborative addition to the team. My goal is to help you deliver a robust user experience and maintain a clean, reusable codebase.

Skills

- Modern React JS including hooks, reusable components, performance optimization, and utilizing best practices
- Redux, React Router, Elastic EUI, Bootstrap
- Typescript, GraphQL/Apollo
- JavaScript ES6+, Jest, Webpack
- Git, Github, Agile methodologies
- Strong semantic HTML and CSS skills

Education

FreeCodeCamp – *Responsive Web Design 2021*

Developer certification representing approximately 300 hours of coursework

Experience

Budgetwise

Frontend Developer

Jan 2020 – Sep 2022

- Worked in a small team in an agile environment
- Helped migrate legacy codebase to modern practices and react hooks
- Performance optimization using virtualization and caching
- Created pixel perfect UIs based on figma designs

Rooms To Go

Frontend Developer

Sep 2022 – Present

- Large team based environment working on customer-facing E-commerce projects
- Uses Azure DevOps to keep track of user stories and task management
- Troubleshooting using developer tools
